Ansell

NEW

The patented Ansell Grip Technology™ ensures that the coating polymer does not penetrate the knitted liner during manufacture. The coating is therefore consistent and sound, significantly reducing the likelihood of chemical leakage onto the skin. Available in two lengths 305mm and 355mm.

Length 305mm

Gloves, nitrile, chemical resistant, Nitri-Solve®, PPE Category III

S4

Best

Made from a special nitrile (NBR) compound, providing excellent protection against abrasion, puncture, cut and snag and resistance to a broad range of solvents, animal fats and other chemicals. Permeation testing shows that Nitri-Solve's chemical resistance is equal to or better than that of any other similar nitrile glove. Case-hardened finish enhances both chemical and abrasion resistance and makes it easy to pull on and off. A non-slip grip makes wet work easier and safer, and NitriSolve's ergonomic design maximises comfort. Available in flock lined and unlined styles. Each hand is embossed with glove size for ease of pairing after laundering. Thickness 0.38mm and length 330mm. Chemical resistance data for this PPE Category III product is available at www.chemrest.com or via the Fisher Scientific website.
