Pump, vacuum, filter, polypropylene

Evacuates a 5L container to 20mbar in about 19min, water pressure 100kPa. Will work on pressures up to 1,000kPa. Non-return valve eliminates back flow. Useful for sucking to waste any chemicals or for filter work. Easily dismantled for cleaning. Evacuating nozzle tapers from 9mm to 16mm. The accessory connectors can be pushed onto the evacuating tubing to act as a quick release from the pump. Autoclavable.
