Spatulas, polystyrene, static free

CORNING

- Rigid, non-toxic with good chemical resistance to aqueous solutions
- Gamma radiation sterilised
- Ideal for working with carcinogens or other toxic materials
- Each spatula is static free and thus less prone to coating with materials

Spatula, sampling, Sterileware™

Scienceware
BET-ART PRODUCTS

Ideal for every type of powdered or granulated material. This 229mm long spatula accommodates twice the volume of a standard reusable spatula, facilitating sampling from large containers, bags or straight from production lines. The sturdy edges may be used to break up any caked material while sampling. Individually wrapped.
