Mat, contamination control, anti-microbial, IdealMat™

ITW ALMA

04

NEW

The new IdealMat™ from ITW ALMA is an adhesive-coated contamination control mat that captures particulates from foot traffic and equipment wheels, providing the most effective dirt and dust removal method available.

The mat offers a consistent adhesive coating on each layer, is available in 30 layers, and has an antimicrobial agent in the coating to reduce the potential for spreading germs and bacteria in the controlled area. ITW ALMA's technical expertise and exact formulations ensure a consistent adhesive coating on each layer of the mat. Eight mats per pack.

Documentation sheets, TexWrite® 22

04

ITW Texwipe

NEW

ITW Texwipe latex-saturated cellulose documentation sheets enable you to control both contamination and information flow.

Cellulose paper saturated with synthetic latex substantially reduces particle generation associated with standard papers. Texwipe validates the quality of the materials with advanced testing and quality control to assure you of cleanliness and consistency.
